VENDORS FOREWORD

Halls are delighted with instructions from Plowden Farming Partnership to conduct this Genuine Reduction Sale at Bishops Castle Market on Thursday 6th June. It is not every day that animals from a herd of such note come to market, and we strongly encourage interested parties to make the journey to the sale.

Plowden Farming Partnership bought Malcom Corfield's herd of Stabiliser cattle on his retirement in April 2021. It was an easy decision to take on the herd because of the Stabiliser's ability to excel in a variety of management regime scenarios. They are very easy calving, with no assisted births in the last five calving seasons and also highly fertile returning to the bull on time, every time. The herd is run on a low input, forage only system, but when youngstock are placed into an intensive finishing regime, they respond very quickly and are a popular choice with many finishers.

Myndtown Farm has begun the process of modifying the farming system from a traditional feed and fertilizer regime, to a system employing regenerative practices and also working around a Higher Tier Countryside Stewardship agreement, as a result, we are having to reduce our stocking levels, while simplifying the system. We have decided to move to an entirely spring calving herd of cows and create space to finish their progeny on farm.

The autumn calving cows presented for sale have all been PD'd in calf to Myndtown Ulric and Birdsall Ulf and are due to calve in mid-August, with the majority having calves at foot by the same sires. The spring calving cows are presented with calves at foot, by Myndtown Ulric with Birdsall Ulf having sired the heifer's calves.

The herd is in the SAC premium Cattle Health Scheme and have tested negative / clear for BVD and are currently Johnes R3 due to the fact that we only enrolled in the scheme last year.

Finally, I would just like to add that these cattle are good working stock not pampered or pushed, they spend a large part of the grazing season at 1300ft on an enclosed part of the Longmynd, on land classified as SDA and correspondingly poor herbage and yet still perform, which is a credit to the breed and their inherent genetics.

We look forward to meeting you at the sale and if you have any questions in the meantime, please contact the selling agents.

HERD HEALTH STATUS – (Please refer to vet's report)

The herd are on the Premium Cattle Health Scheme. They were tested on the 3rd July 2023. They were tested for BVD and Johnes Disease. The herd passed the BVD test. There were 3 animals that tested positive for Johnes antibodies. Of the 3 cows that tested positive, one has been culled and the other two are in a separate cull group.
