VENDORS FOREWORD

In 2018 my wife Ellie and I had this seedling of an idea about venturing into dairy and building up our own herd. We were lucky enough to have the opportunity to rent Frankton Hall, Ellie's grandparents farm. With a very young family and work commitments to fund the project we knew it would be difficult. On a tight budget we got the system up and running and after calving 79 heifers in the autumn of 2019 milk started to flow. These heifers were a great foundation to the herd with breeding from Richard Clarke Bicton and Davies Pencwarre Crymych standing out as our future breeding lines. We added a few older cows along the years as we could afford.

With Ellie's upbringing in dairy and with the knowledge gained from working with my dairy customers being a nutritionist, over the years we knew what we liked visually and what type of cow and system was needed to be profitable. We worked hard and had to be brutal in our first couple of years only breeding replacements from fertile and classy cows.

With the help of Bryan Davies from Genus we started on our project of breeding milky cows that were nice to the eye. We focused on positive Fats and Proteins and daughter fertility but we wanted good feet and legs, correct rump angle and a cow with capacity as we wanted milk from forage to make our herd profitable as we knew that the milk price would never be in our control.

The herd has improved year on year with this years heifers being exactly what we have wanted.

Our system has been autumn / early winter block starting to calve in August and finishing off in late December with a handful into January. The cows come in prior to calving and once dropped are housed and fed to milk and get in calf. With my background in dairy nutrition and with the help of one of my close friends Iwan Vaughn we feed the cows extremely simple driving as much quality forage into these cows as possible. The diet is simply grass and maize silage 50/50 with 6.5 kg of blend with all cows having 3kg in the parlour each end of the day and 2.5kg for heifers as we have no modern technology on the parlour for feed to yield feeding. The aim is to get these cows eating as close to or just over 60 kg of TMR. If they can do this, with good management the cows can do the rest.

Once the cows get to spring they are turned out to graze as soon as ground conditions allow, being buffered at evenings to avoid too much of a milk drop. Our cows generally will still be averaging 34 litres towards the end of March. We love seeing the cows graze and having sun on their backs and the magic moments have been letting the kids run around the fields getting the cows up for milking.

The early years were very busy and rewarding with most mornings milking with Medi our eldest in the pushchair fast asleep. When Ellie was expecting our second child we soon saw a huge difference in intensity and when Alffi was born, two pushchairs took a lot of room up in our cosy parlour. As the children have grown and our working commitments have remained we have relied more on staff and like other farmers I'm sure they agree this is a major issue in the industry.

We have tried our best to recruit but with the early starts due to the system here being dated it means long hours and hard work and the churn of staff is a tough pill to swallow.

I have kept telling Ellie, I'll just get up earlier and work later but it gets to the point where it takes its toll physically and mentally. The arthritis in my hands is worsening month by month with it making some tasks virtually impossible. Unfortunately I don't operate at anything but 100% and our cows have had the best of everything but this can be a weakness as well as a strength as it drains you at times, the cows have been a part of the family but sadly it has led to the head telling you one thing and your heart telling you another.

Frankton Hall is a truly wonderful farm and home but it has got to the stage where significant investment is required and with our two little children needing our energy and time we have made the extremely difficult decision to change our farming policy. Years ago our aim was to build a cow that worked around our working commitments and family life. With our passion for our cows and the industry we deviated from this slightly by breeding a cow that needs your devoted time and efforts if she is to perform to her full potential. I strongly believe that these cows will fly in a twice a day system but will excel when milked 3 times a day and put into modern fertilities.

Lastly we would like to thank the people that have supported us so well in this chapter of our lives, there are too many to thank but you all know who you are, from family and friends, staff past and present and businesses that we have dealt with regularly.

A chapter that sadly was never supposed to end but life throws difficult decisions at us at times. We have had to be brave and think of our two little children. Agriculture and the passion for stock is in our DNA, and that will never disappear, it is engraved in Medi and Alffi to.

This is certainly not the end.....

Guto Llwyd Lewis on behalf of Guto, Ellie, Medi, Alffi.

Auctioneers' foreword

Halls are honoured to receive instructions from Guto and Ellie Lewis to Disperse their Purebred Autumn Commercial Holstein Herd on Tuesday 28th January 2025, following the Show and Sale of Dairy Cattle.

The herd is on fantastic form and of the very highest quality with everything bar a couple of herd favourites fresh since August 2024 up to the sale. This will be one of if not the best herds to sell anywhere in 2025! The foundation of the Herd was purchased in 2019 when Richard Clarke of Bicton decided to sell his highly respected herd. Heifers have also come from Davies, Pencwarre Farm, South Wales. Guto has since managed these cows to a very high standard on a simple commercial system, the records speak for themselves.

The Herd is NMR recorded (17.12.24) with daily NML milk quality reports (19.01.25) the averages are as follows:

9978KG 4.79%bf 3.54%ptn 50cc

CURRENTLY AVERAGING 36.5KG PER DAY. with 380-day Calving index and a Bactoscan of 13

The cows are cubicle housed and milked through a herringbone parlour, both of which require investment if milk production were to continue. Finding good long term reliable staff is a never-ending battle, when you put into the mix both Guto's and Ellie's other commercial interests and young family the brave decision to cease milk production at Frankton Hall has been made while the cows are on **TOP FORM!**

Tuesday 28th January, get to Shrewsbury you will not be disappointed, **POWER, BALANCE, PRODUCTION, BEAUTY – A DAIRYMANS DREAM**

BREEDING POLICY

With the support of Brian Davies at Genus, Guto has bred these cows bred with a strict focus on Fertility and Constituents without sacrificing milk, other factors are Chest Width and Rump Angle using 2 or 3 top Holstein bulls per year, 1 for the cows and 1 for the heifers. The bulls used in each breeding cycle were:

2019 - ABS Elderidge and Denovo Archer

2020 – Seagull-bay Applejax and ABS Sassafras

2021 – Denovo Grenade and Denovo Sizzler

2022 – Denovo Percy and Denovo August

2023 – Schurer Hammon Darius, Mecca P, Bomaz Tyce and Adelgaard Kasino (Jersey)

2024 – Denovo Reality, Denovo Grenade and Winstar Meadow PP

All Dairy Semen is Sexed

HEALTH STATUS, - please see veterinary report

TB Tested 3rd January 2025, BVD Vaccinated 03.01.25, Lepto Vaccinated annually at turnout, IBR Vaccinated November 2024 (Twice Yearly)

VETERINARY REPORT

My practice has provided veterinary services at Frankton Hall for many years and we were pleased to be asked to help when the milking herd was re-established by Guto and Ellie in 2019.

The herd is full vaccinated against BVD (boosted January 2025), Leptospirosis (May 2024) and IBR (October 2024). Regular monitoring of bulk milk for the presence of BVD PI animals and youngstock screening for BVD antibodies has been consistently negative. The herd is monitored for Johnes disease and an effective control plan is in place which has ensured that the disease is well controlled.

Cows were vaccinated at drying off in Summer 2024 to protect calves against diarrhoea with Bovigen Scour. Mastitis levels are very low in the herd and the average SCC is around 50.

This is a very well-run herd and we wish Guto and Ellie the very best for the sale and with their future farming plans.

Mark Spurdens

Blakemere Veterinary Centre.

SERVICE GURANTEEE

The herd have been PD' regularly and results are giving with the catalogue, only those over 10 weeks are guaranteed under the rules of sale, i.e. those served on or before the 19th November 2024

General Information & Sale Notes

METHOD OF SALE

All Cattle will be sold in £ per head. The sale will be conducted under the Livestock Auctioneers association on Conditions of Sale 2022 as amended. A copy will be available at the Auctioneer's office.

COMMISSIONS & PHONE BIDS

The Auctioneers will dutifully execute commission to Purchase for buyers unable to attend the sale, provided written instructions are received no later than 24 hours before the sale.

Telephone bids can be arranged by contacting the Auctioneers office again 24 hours before the sale

SETTLEMENT & CLEARANCE OF STOCK

Settlement Is due in full immediately at the close of the sale. No animal may leave without a "Pass Out" from the Auctioneers Office. All stock left at the sale on this basis are at the purchasers' risk and purchasers MUST notify the auctioneers of their intended collection time

MARTEYE AND ONLINE BIDDING

Live Bidding via Marteye will be available throughout the sale, please note new purchasers MUST register no later than 3pm on the day prior to the sale.

WARRANTY – TIME IS OF THE ESSENCE

PLEASE NOTE UDDER WARRANTY GUIDELINES:

- Unless otherwise announced or declared, any heifer or cow in milk or cow in calf at the time of sale shall carry a guarantee that she is sound in udder and teats at the time of sale, all claims.
- **Any claims against the guarantee must be made to the Auctioneers by 12.00** noon on the day following the sale for a cow in milk or within two hours following the close of the sale for a dry cow.
- No Guarantees for any animal sold under £800.
- If the Auctioneers are in agreement that the udder is not sound, then the sale, at the discretion of the vendor, may either be cancelled or an adjustment in the price paid agreed between vendor and purchaser.
- The vendor warrants that any cow or heifer sold as being **in calf** is **in calf** at the time of sale, this is a 38 + 5 day warranty.

All cows served 10 weeks or more are Guaranteed in calf on the day of sale, this is a 38 + 5 day warranty, no claims after this time will be accepted.

NEW PURCHASERS & CONDITIONS OF PAYMENT:

All accounts must be settled on the day of sale, no credit will be available. Any prospective purchaser's unknown to the auctioneers wishing to pay by cheque must make the following arrangements at least 7 days prior to the sale.

1. Inform your Bank Manager that you wish to pay by cheque. Tell them the likely amount that you intend to spend and instruct your Bank Manager to inform us by e-mail **market@halls.gb.com** that it is in order to accept your cheque.
2. Arrange with your Bank Manager for a guaranteed cheque to be issued.
3. Debit cards accepted,
