AUCTIONEERS' FOREWORD

Halls are delighted to received instructions from H Davies & Partners to disperse their Brown Swiss x Fleckvieh Cows and Heifers on Tuesday 25th March 2025.

I believe that is the only herd of its kind in the country, with a special blend of Brown Swiss and Fleckvieh resulting in prolific, powerful and robust cows which stand the pressures of a modern dairy farming. This profitable herd of cows will be well recognized by many being regular weekly vendors at Shrewsbury since 2017, comes onto the market as the family dissolves the partnership with the majority youngstock retained for the future of the business.

The Majority of the herd are sold in calf to sexed British Blue Male, the calving pattern is as follows: - 11 Fresh at Sale, 6 Due April, 14 Due May, 13 Due June, 18 Due July, 10 Due August, 9 Due September, 7 Due October, 11 Due/Served November. All cows are dried off with Sealant and Orbenin Extra. The herd is not being pushed at the moment as there are so few fresh. The family are confident the herd will produce more milk as soon as they can get out and graze, the herd is not milk recorded but based on milk sales is producing.

8000kg

4.01%bf

3.40%ptn

79cc

The herd was TB Tested on 3rd March 2025, there has not been a confirmed case for over 6 years on the farm. The here is Monitored for BVD, Lepto and Johnes whilst Vaccinated for IBR.

If you after robust hassle-free cows for 2025 look no further than Shrewsbury Auction Centre on Tuesday 25th March 11.15am a date for your dairy is the machinery dispersal which will take place on Friday 25th April at Manor House Farm

VETERINARY REPORT

Herd Owner: H Davies & Partners

Farm Name: Manor House Farm

Herd Location: Puddington Lane, CH645SL

Date of Report: March 2025

Veterinary Practice: Leahurst Farm Animal Practice, University of Liverpool

Veterinarian: Niall Connolly

Herd Health Overview:

This report provides a summary for the dairy cattle being presented for sale. This is a young herd of Brown Swiss / Fleckvieh Cross cattle. The herd is well-managed and in good health, with a structured disease control and vaccination programme in place.

Johne's Disease Status:

- Johnes is monitored through whole herd screening and the farm have adopted the control strategy; Improve farm management Test and cull.
- No clinical cases have been identified in the past 8 years.

Vaccination & Disease Control Programme:

- IBR (Infectious Bovine Rhinotracheitis): The herd is vaccinated every 6 months with Bovilis IBR marker LIVE ensuring ongoing immunity.
- BVD (Bovine Viral Diarrhoea): Unvaccinated, Herd Monitored through routine blood testing
- Leptospirosis: Unvaccinated (Regular Bulk Milk Sampling suggests low exposure)

Other Health Information:

The herd is closed and follows a strict biosecurity protocol to minimise disease risk. Routine fertility visits and health checks and veterinary assessments are conducted regularly. Fluke exposure is checked annually via milk and faecal sampling. The herd is low risk. Cattle are exposed to lungworm but are treated post turn out and housing with Eprinomectin. The herd is TB free and conducts annual herd testing.
