BELOW

MENAI JERSEYS YOUNGSTOCK REDUCTION

MENAI JERSEYS, ANGLESEY

This is the 1st Sale in the planned Dispersal of youngstock for Menai Jerseys. This herd has grown rapidly since it was first established back in 2012 when Matt returned from Harper Adams University and took the farm back in hand and the Menai Jerseys Prefix was formed. The very first registered heifer was Menaijerseys Roman Solstice, a cow which still lives and milks on the farm today, she will be 13 on the 20th June 2026.

Now in 2026 Menai Jerseys is the home to 1000 Mainly pure Jersey Cows with Ayrshires, Danish Reds Holsteins and British Friesians, due to this rapid growth in around 2020 pedigree registration ceased the next step now will be to focus on milk production in a flying herd system to better suit the farm infrastructure. This unique, long living herd is currently averaging 7100KG at 5.5%BF and 4.2%protein.

The Heifers are a cross section of all ages being mainly pure Jerseys or 1st Cross Jersey/Holsteins. Those that have been AI'd or running with the bull will be Pd' in advance of the sale. All have been BVD, IBR and Salmonella Vaccinated and calves all given Intranasal Respi and Respi 3 at a month old. Cows are treated with Rotavec Corona at Drying off.

TB Tested on 8th June 2026
