AUCTIONEERS FOREWORD

Halls have been favoured with instructions from James Paddock to commence the dispersal of the Flying Herd from Whitton Farm. The remainder of the herd will be sold as they calf through our weekly dairy sales.

Milk and Power, they have always been the criteria for James when buying in Shrewsbury ringside throughout the year we are going to miss his presences as one of the buyers of the top-quality fresh heifers and young cows' week in week out. There are some great pedigrees in the sale many of which are bred at the homes of the great herds who choose to sell their dairy cattle in the Shrewsbury weekly dairy sale.

This first consignment in the dispersal represents the High yielding group made up of Winter and Spring Calving Cows which are currently averaging 36kg per day!! 16 x 1st Lactation, 17 x 2nd Lactation, 18 x 3rd Lactation, 4 x 4th Lactation and 4 x 5th Lactation individuals.

This is a true flying herd with, not milk recorded, all cows are served to the Fertility plus Blue Elite semen to produce a high-quality beef calf The 7th June NML milk laboratory report shows the milk quality for the WHOLE herd as

4.65%bf 3.50%ptn 199cc

The Herd is cubicle Housed and milked twice Daily, If you admire powerful Holsteins cows with deep bodies and full udders of milk, come to Shrewsbury on Tuesday 16th June 2026.

Jonny

Paddock Whitton Farm

James has a high producing flying herd. He can be proud of what he and his team have achieved in the last 11 years to get the herd to where it is today. They are all year-round calving, and only AI to British Blue. Regular bulk milk checks for infectious diseases are done.

Production and milk quality:

Cows are milked twice a day in a herringbone parlour. Up recently they were on 3 times a day milking.

Average milk/cow/day is 31 liters on twice a day milking. 4.61% fat and 3.51% protein.

SSC over the last year has always been below 200, with mastitis cases at 22 cases/100 cows/year. All cows are dried off with antibiotics and sealant.

Fertility:

We have been doing regular fortnightly routine visits for fertility and post calving checks. No problems with retained cleansings and metritis.

Calving interval is 390, pregnancy rate 19%.

Heath status:

As this is a flying herd, there is less control over health status. But the aim has always been to buy in cows from herds with a low risk status for BVD and Johnes.

Annual bulk milk testing for BVD, IBR and Lepto are done.

Johnes control. The whole herd is yearly screened for Johnes.

All cows are vaccinated for BVD and IBR. And were last vaccinated in November 2025.

The cows at Whitton Farm have always been well looked after by James and his team, and will be in the future as James will still carry on with a smaller number of cows. I'm proud that myself and the rest of the Stapeley team have been able to, and will keep work(ing) closely together with James.
