How to become compliant with BVD legislation?

In line with the Bovine Viral Diarrhoea (Wales) order 2024 every farm **must** screen their herd annually for BVD antibodies.

The first annual screen must be carried out by 1 July 2025.

Every farm must screen for BVD - there are no exceptions.

The results of this screen will provide farms with a BVD status and determine if further investigative work is required for legislative compliance.

We anticipate that 80% of herds will screen negative and the only legislative requirement placed on these herds would be to continue to screen annually.

BVD Herd Status:

Every farm will be given a status. The two possible statuses are explained below:

BVD Negative Status

This status is awarded when all five youngstock in each management group tested as part of the annual screen all have a negative antibody result.

Or, when a farm has completed a PI Hunt, all PI animals have been removed, and an application to change the farm status has been submitted.

Next steps:

Maintain Biosecurity.

Continue to screen annually.
